SPYDUAL SHOT

RE&BOMB SPYDUAL SHOT

Clinic-grade LDM water-drop ultrasound, brought home.
A premium home-care device for real clinical results.

Dual Ultrasound 3•10MHz

1.4W High Power

100% Made in Korea

Product Introduction • June 2026

Six Reasons It Is Fundamentally Different From Budget Devices

01

Made by the Hands Behind Samsung Galaxy

Produced by Sungwoo Electronics — a listed manufacturer that mass-produces Samsung Galaxy camera lens covers — through dedicated capital investment.

Samsung Tier-1 Vendor • Listed Manufacturer

02

100% Made in Korea

Every process completed on precision domestic production lines rather than overseas OEM, ensuring consistent quality.

Made in Korea

03

Medical-Grade Titanium Head

A gentle, medical-grade titanium contact surface that lowers corrosion and allergy risk — safe even during pregnancy.

Sensitive Skin • Pregnancy-Safe

04

Aerospace/Medical-Grade Aluminum Body

A lightweight metal body, not plastic. Packaging alone costs 12,000 KRW per unit — quality felt the moment it's held.

Metal Body • Premium Packaging
RE&BOMB • SPYDUAL SHOT

05

Dual Ultrasound, 1.4W High Power

Dual frequency at 3MHz + 10MHz, delivering up to 4x the output of low-cost devices (0.3–0.5W).

Top Output for Home Use

06

Efficacy Proven by Clinical Data

Verified by the Korea Institute of Dermatological Sciences: +65.66% improvement in skin radiance after a single use.

Certified Human Application Trial

PRODUCT OVERVIEW

Clinic-Grade LDM Care, Completed in 12 Minutes a Day at Home

Spydual Shot recreates the LDM (Low-level Dual Mode) water-drop ultrasound treatment — once available only at dermatology clinics and aesthetic centers for hundreds of thousands of won per session — as a home beauty device. The premium care once reserved for the top 0.1% of actresses is now a 12-minute daily home routine.

Dual Ultrasound

3MHz + 10MHz dual frequency

High Power

Up to 1.4W · top tier for home use

Premium Materials

Medical-grade titanium head + aluminum body

Clinical Certification

Korea Institute of Dermatological Sciences trial

WHO MAKES IT

The Hands Behind Samsung Galaxy Now Work on Your Skin

Spydual Shot is manufactured directly by Sungwoo Electronics, a listed manufacturer that produces camera lens covers for Samsung Galaxy smartphones, through dedicated investment in production equipment. The same precision and quality-control standards used for semiconductor and mobile components are applied to this device.

Samsung Tier-1 Vendor

Listed manufacturer with a track record producing Samsung Galaxy camera lens covers

Capital-Invested Production

Dedicated equipment investment on a production line built exclusively for Spydual Shot

0.01mm Precision Machining

Mobile-component-grade precision machining and rigorous quality control

100% Made in Korea

Full process completed domestically for consistent quality and stable supply

Packaging alone costs 12,000 KRW per unit — **uncompromising quality you feel the moment you hold it.**

Results Proven in Numbers

Based on a Korea Institute of Dermatological Sciences human application trial

65.66%

Improvement in Skin Radiance

Measured immediately after a single use

15.24%

Improvement in Skin Elasticity

Measured after two weeks of use

Individual results may vary. Figures are based on human application trial results.

From the Skin's Surface to the Deep Dermis: Dual Ultrasound

Unlike single-frequency budget devices, two frequencies divide the work between surface and depth.

3MHz

3,000,000 vibrations / second

Reaches the dermis for deep elasticity and jawline contour care

10MHz

10,000,000 vibrations / second

Focuses on radiance, hydration and absorption without surface irritation

One device, both surface radiance and deep elasticity — complete, full-spectrum care.

Not Ordinary Stainless Steel — A Titanium and Aluminum Metal Body

1 Medical-Grade Titanium Head • Safe for Pregnancy

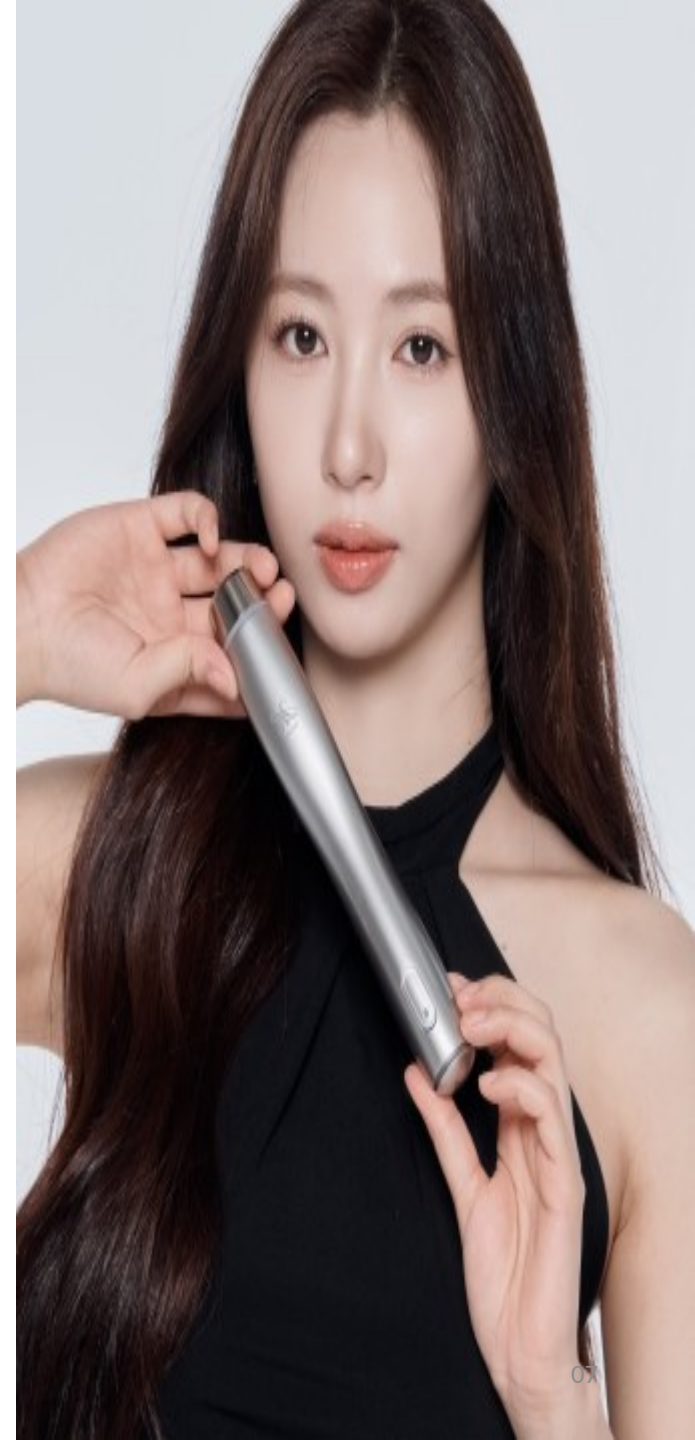

A fundamentally different material from standard stainless steel (STS316). Lowers corrosion and allergy risk while delivering even vibration — painless and non-irritating, safe even during pregnancy.

2 Aerospace/Medical-Grade Aluminum Body • 0.01mm Precision Machining

A lightweight metal body, not plastic. Manufactured 100% in Korea with the same semiconductor-grade precision machining and quality control used by the listed Samsung-vendor manufacturer.

3 Maximum Output: 1.4W

Up to 4x the output of budget devices (0.3–0.5W), delivering professional-aesthetic-level energy reliably.

A Clear Difference From Budget Devices — Premium Is Different

Category	Budget LDM Devices	Spydual Shot
Manufacturing	Small OEM · unverified origin	Samsung Tier-1 vendor, listed company · 100% domestic
Frequency	Single frequency	Dual 3MHz & 10MHz
Ultrasound Output	0.3–0.5W low power	1.4W high power (top tier for home use)
Material	Stainless steel · plastic body	Medical-grade titanium head + aluminum body
Safety	Possible irritation	Painless, non-irritating · pregnancy-safe
Clinical Certification	None	Korea Institute of Dermatological Sciences certified
Total Cost of Ownership	1.0M–1.5M KRW (repeat purchases)	1.29M KRW, for life

One Treatment's Cost, a Lifetime of Care

Clinic LDM Treatment

3.5M–12M KRW / year

- Requires booking every visit
- Effects fade once treatment stops
- Cost recurs every year

Spydual Shot (Device + Ampoule)

1.29M KRW, once

- 12 minutes a day, on your own schedule
- Painless, non-irritating daily routine
- Full-spectrum radiance, hydration & elasticity care

Up to 90%+ cost savings versus clinic treatment in year one — no further cost after that.

DAILY ROUTINE

12 Minutes a Day: The Simplest Premium Routine

STEP 1 • Apply

After cleansing, apply the dedicated ampoule or a water-based gel to the entire face.

STEP 2 • Care, 12 Minutes

Select a mode and glide gently along the cheeks, forehead and jawline.

STEP 3 • Finish

Let the remaining ampoule absorb, then complete with your regular skincare.

ABOUT US

BEAUTYBOMB Co., Ltd. · Brand RE&BOMB

Under the philosophy "Clinic results, every day," RE&BOMB is a beauty device and cosmetics brand that delivers clinical-grade efficacy through proven technology and premium materials. Spydual Shot is the flagship product of the RE&BOMB device line.
